

# Maimonides Medical Center

Maimonides Medical Center announces the launch of a new innovative CPE program, open to persons of all spiritual traditions, housed in one of New York's historic Jewish hospitals, Medical Center in the heart of Brooklyn. The doors are open for an extended unit starting this September.

The Chaplaincy Department of Maimonides Medical Center is thrilled to announce the creation

The inaugural unit will be an Extended CPE Unit that starts in September 2022, and ends in May 2023.

The tuition of \$500 is due on the first day of the program.

Applications are accepted on a rolling basis.

When students enter the Clinical Pastoral Education Program at Maimonides Medical Center, they enter a culturally and religiously sensitive, multidisciplinary community of healthcare professionals. As new members of this community, they will find themselves interacting with other members from doctors, nurses, and technicians to social workers, therapists, and administrators. Through the intersection of these disciplines, students will come to understand the integral role of spiritual care in "holistic healthcare."
