

Forbes Magazine has rated WakeMed Health & Hospitals as the best hospital to work for in the state of North Carolina for the past two years and we are very proud of that reputation. As the only Level 1 Trauma hospital within a five-county radius, we have the 13<sup>th</sup> busiest ED in the country. As a result, students of our program develop specialized skills in trauma-informed care for the most marginalized within our communities.

The Clinical Pastoral Education (CPE) program at WakeMed Health & Hospitals is accredited by ACPE. WakeMed offers Level I and Level II CPE programs. Through intense involvement with persons in need of spiritual care along with feedback from peers and educators, students gain a new understanding of ministry and develop new awareness of themselves and the needs of others. They develop skills in interpersonal and inter-professional relationships using the interdisciplinary team process of helping others, attending educational seminars, and reviewing written reports.
